Evaluating web sites: Putting it all together

You've been given an assignment about carbon pricing which must presents arguments from both sides. During your online research you find 5 items. For each item:

A. Choose the material type that best fits the source.
B. Identify the author.
C. How you would use each source in your research process, if at all

1. Wikipedia article: Carbon pricing in Canada
   https://en.wikipedia.org/wiki/Carbon_pricing_in_Canada
   A. Choose the material type that best fits the source.
      - Academic article
      - Blog post/Editorial/Opinion
      - News article
      - Report
      - Webpage
   B. Who is the author(s)?
   C. How you would use each source in your research process, if at all?
      - Background research to better understand the issue before searching elsewhere.
      - Basis of the main point of your paper.
      - Example of a particular point of view.
      - Source of references to other articles and items on the topic.
      - No use at all.
      - Other?

2. Pan-Canadian Framework on Clean Growth and Climate Change
   A. Choose the material type that best fits the source.
      - Academic article
      - Blog post/Editorial/Opinion
      - News article
      - Report
      - Webpage
   B. Who is the author?
   C. How you would use each source in your research process, if at all?
      - Background research to better understand the issue before searching elsewhere.
      - Basis of the main point of your paper.
      - Example of a particular point of view.
      - Source of references to other articles and items on the topic.
      - No use at all.
      - Other?
Evaluating web sites: Putting it all together
